14. SUMMARY

SECRET (b)(1)

TW had not decided on an artillery projectile for chemical fill as of 1973. He states, however, that TW artillery officers had a high regard for the 4.2 inch mortar: they considered it to be a versatile, mobile, and highly accurate weapon. This attitude on the part of TW officers leads Source to believe the 4.2 inch mortar would receive primary consideration as a delivery vehicle. Source adds that in any case TW would be limited to a US projectile for this purpose (NFI). (b)(1)
